1. Product Overview

- **NON-CONTACT INFRARED** - Great for use with infants, children and adults. This non-contact infrared thermometer allows a user to hold the thermometer at a close distance from the body to measure temperature without touching the forehead.
- **EASY TO READ RESULTS** - A digital display allows the user to quickly read temperature test results in Fahrenheit or Celsius, and diagnose fevers.
- **ONE SECOND TEST** - Fast results in 1 second or less allow for the quick diagnosis of fevers, especially easy to assess restless or sleeping children and adults.
- **READINGS STORED** - Store up to 20 temperature readings which can easily be recalled for reference.
- **SAFE TO USE** - Infrared thermometers are safe to use on infants, children, and adults, plus they help prevent the spread of infections with a contact free design.
- **PRECISE ACCURACY** - Thermometer uses accurate temperature sensing data and an infrared sensor to quickly provide test results.

2. Specifications
